Education

Vellore Institute of Technology

Integrated M.Tech in Artificial Intelligence (CGPA:- 8.28)

September 2022 - May 2027

Bhopal, Madhya Pradesh

Vyas World School

Senior Secondary (Percentage:- 93%)

March 2021 - April 2022

Bareilly, Uttar Pradesh

Experience

AI Intern

October 2025 – December 2025

InfoAxon Technologies India Pvt. Ltd.

Noida, Uttar Pradesh

- Collaborated with a 3-engineer team to deliver OCR solutions, meeting client requirements and sprint deadlines by 100%
- Engineered a robust Document OCR pipeline using Python, Tesseract, and OpenCV to automate high-volume data extraction from critical financial documents.
- Achieved 90% accuracy on noisy document images by implementing custom preprocessing algorithms, reducing manual verification overhead by 20%.
- Researched and evaluated phonetic algorithms for automated name correction, identifying opportunities for accuracy improvement.

Projects

Deezcord - Real-Time Chat Platform | Next.js, SocketIO, Prisma ORM, TanStack Query, LiveKit, Radix UI, Tailwind

- Engineered a decoupled WebSocket architecture, achieving 50ms visual latency for real-time communication by injecting live payloads.
- Designed a normalized relational schema using Prisma with compound unique indices, guaranteeing O(1) lookup performance for 10,000+ message nodes.
- Accelerated an optimistic update strategy and virtualized DOM lists, maintaining stable 60fps scrolling performance during high-volume writes.

FoodShare | React.js, Firebase, Google Maps API, Chart.js, Tailwind CSS, Chakra UI, React Context API

- Assembled an event-driven system using Firebase Realtime Database, synchronizing live inventory across devices with <100ms latency
- Integrated Google Maps API and implemented a normalized NoSQL schema, ensuring O(1) lookup efficiency for user roles.
- Constructed a responsive dashboard with React Hooks/Context, minimizing client-side processing load using O(n) algorithms.

TalentScout - Intelligent Hiring Assistant | Python, Streamlit, LangChain, Pinecone, SQLite, Docker

- Built a RAG-based LLM system using LangChain with embedding-based retrieval using Pinecone for contextual question generation
- Optimized database queries with SQLite indexing to efficiently process 500+ mock profiles, ensuring scalable performance.
- Achieved less than 1.2s interactive latency and 99% uptime by deploying the application via lightweight Docker containers.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL

Developer Tools: Docker, Git, VS Code, Postman, AWS, Firebase Console, Google Cloud Platform, Ollama

Technologies/Frameworks: Node.js, React.js, Express.js, Next.js, Flask, Streamlit, OpenCV, LangChain, Pinecone, Gemini Pro API, Socket.io, Prisma ORM, LiveKit, Chart.js, Tailwind

Leadership / Extracurricular

Odoo Hackathon 2025

August 2025

AI Developer

Odoo Hackathon

- Co-developed 'TravelTrotter', an AI-driven travel planner using Gemini API, winning recognition for seamless UI/UX integration.

VIT Bhopal Tech Hackathon

March 2024

API Developer

VIT Bhopal University

- Developed scalable backend APIs for an e-commerce platform using the MERN stack within a tight 24-hour deadline.
